Re: RED ALERT! What does FEMA know? Seeking contractor for Bio-disposal of Tents and 40 Yard Dumpsters

FEMA is seeking contractors who can supply MEDICAL BIOHAZARD disposal capabilities and 40 yard dumpsters to 1,000 TENT HOSPITALS across the United States; all required on 24-48 hour notice.

Based on this and other previous (insane) bizops orders from FEMA its pretty obvious they are spooling up the National Disaster Medical System to respond to some national catastrophic. The obvious candidates are a H7N9 pandemic or a worsening of the current H1N1 epidemic.

There always "something" up in the minds of conspiracy theorists.

What wrong with being prep for anything and everything that "might" happen?

Next year people will be saying the same things that have been post one to many time. Then the 2016 will come around and things that where posted in 2012 will be brought up again saying it will happen that year or the year after that.

Just think if they did not prep people would blame them for that to.

Im sorry but the time to blame the government has come to pass. It's now on the people hand for what ever happen if anything. The people have had warnings after warnings and have done nothing to stop government from fuck this country up any more then what it is now.

The people are a fault but yet the people can't handle that type of thinking.

Whatever it is, it's not localized. It would take a nation-wide or international scale event to require 1000 mobile hospital units **in addition to existing medical infrastructure...**

And on 24~48 hours notice... so mass casualty event, or a very virulent outbreak (need to get the facilities in place before the contractors all come down with whatever it is).

And the not so obvious. Prior (years) to the New Madrid and San Fran quakes booming noises were heard which increased in intensity and frequency. This from archived news papers of that time period. Any also for several months after. There was a thread here the other day on the topic with pictures of the news articles.

Just guessing, but if the New Madrid goes or the Canary Islands cause a Tsunami, or "the big one" hits Cali, or Yellowstone blows, or the Louisiana sink hole rips open into a gigantic methane filled salt dome that blows sky high and then sucks the Gulf of Mexico a few hundred miles inland...

Yeah, they might need a few tents for people and dumpsters for stuff.

This is not a conspiracy, it is a fact.

We have always been in possible danger from a huge event, so why now suddenly take the steps to be prepared?

1000 tent hospitals across the country is not a small thing, I wonder if other countries are doing the same and how could we find out?

If it is a flu thing, it would spread to other countries fast.

I think I better hurry up and make up that Fire Cider.

It seems there are always forces on both sides of any event that might be planned, lets hope there efforts are stopped.

There always "something" up in the minds of conspiracy theorists.

What wrong with being prep for anything and everything that "might" happen?

Next year people will be saying the same things that have been post one to many time. Then the 2016 will come around and things that where posted in 2012 will be brought up again saying it will happen that year or the year after that.

Damn new FLUs rolling around...did you guys catch that bird flu that Canadian female brought back?

Quoting: **Anonymous Coward 52773080**

Shes not "canadian". She was a Chinese girl coming back from China, to Canada
